vSEC:CMS K-Series Operator Card

Brand: Versasec
Product Code: SMAV100MSC-OKC

Short Description

This is the free expert's tool that can be used at the early stages of an organization investigating smart card deployment. It is the system that you use in the first pilot installation and when you are ready to go live, you can upgrade the security level at a low cost and use it as your primary system.

Description

vSEC:CMS K-Series is the smart card management system that grows as your smart card needs grow. This is the free expert's tool that can be used at the early stages of an organization investigating smart card deployment. It is the system that you use in the first pilot installation and when you are ready to go live, you can upgrade the security level at a low cost and use it as your primary system. As your organization grows, there are several documented migration paths to larger smart card managment systems such as vSEC:CMS T-Series.

The Expert's Smart Card Tool

vSEC:CMS K-Series is the only minidriver smart card tool you'll ever need. The application has all the rich smart card management features required such as:

- Online and offline PIN unblock - both server and client side
- Smart card PIN policy manager

- Graphical PIN policy validation during PIN change
- Admin key management with several calculation options
- Advanced certificate/key functions
- Detailed smart card information
- Detailed documentation (online help)

The Most Efficient Smart Card Management System

From the first time the vSEC:CMS K-Series is started in secure system mode, you can instantly register your organizations smart cards with the system and be assured that all management tasks are provided by the system. The system has rich features that you will generally only find in much larger price prohibitive systems, such as: hardware protected master keys, two factor access control, batch smart card registration, smart card repository, built in backup procedures, policy management, and system updates.

Version 2.0 of vSEC:CMS K-Series is now ready for release. The new version includes a long list of smart new features to simplify and speed up smart card administration tasks. Examples of new features:

- Major upgrade of graphical user interface
- Support for Windows 8
- New smart card import Wizard
- Can now be installed for all users on a host PC
- Native support for GTO IDPrime MD
- New options for Gemalto .NET PIN policies
