The Expert's Smart Card Tool

The Expert's Smart Card Tool

vSEC:CMS K-Series is the only minidriver smart card tool you'll ever need. The application has all the rich smart card management features required such as:

* Online and offline PIN unblock - both server and client side

* Smart card PIN policy manager

* Graphical PIN policy validation during PIN change

* Admin key management with several calculation options

* Advanced certificate/key functions

* Detailed smart card information

* Detailed documentation (online help)

The Most Efficient Smart Card Management System

From the first time the vSEC:CMS K-Series is started in secure system mode, you can instantly register your organizations smart cards with the system and be assured that all management tasks are provided by the system. The system has rich features that you will generally only find in much larger price prohibitive systems, such as: hardware protected master keys, two factor access control, batch smart card registration, smart card repository, built in backup procedures, policy management, and system updates.

vSEC:CMS K-Series version 2.0

vSEC:CMS K-Series version 2.0 is now available

New in this version:

* Major update of graphical user interface

* Support for Microsoft Windows 8

* New smart card import Wizard

* Can now be installed for all users on a host PC
