Lumidigm® V-Series V371 Fingerprint Reader

Brand: Smartjac Industries Inc
Product Code: SMAH100114

Short Description
Biometric authentication and card reader on a single, easy-to-use device.

Description
Overview
Lumidigm® V-Series V371 Fingerprint Reader for Biometric Authentication
Lumidigm® V-Series V371 Fingerprint Reader for Biometric Authentication
The Lumidigm® V371 Fingerprint Reader combines the industry-leading biometric authentication of HID Global's multispectral fingerprint sensors and best-in-class contactless OMNIKEY® desktop card-reading technology into a single, integrated unit for strong multi-factor authentication.

Sometimes it's enough to validate a card; sometimes knowing "who" is critical. Whatever authentication policy is employed, HID Global's Lumidigm V371 Fingerprint Reader allows easy verification of contactless cards and fingerprint biometrics on a single device.

The solution provides reliable, convenient and secure method for authenticating both a credential and the individual presenting it. The Lumidigm V371 Fingerprint Reader is ideal for applications leveraging biometric citizen ID cards.

Key Benefits

Secure and Convenient — Provides reliable biometric authentication information that can be used to verify the identity of anyone, anytime. Simply place a card in the cradle and a finger on the plate and legitimate users can be on their way.

Eliminates Fraud — Multi-factor solution protects against fake fingerprints and detects the use of shared or stolen ID cards.

Real Identity Verification — Augment existing credentials with a biometric enrollment for multi-factor verification of the user and their card.

DISCLAIMER: The Lumidigm V-Series V371 Fingerprint Reader, as sold, does not perform match-on-card functionality. Match-on-card functionality may be covered by one or more patents, including US Patents RE43,333 and RE44,034, owned by third parties. The V371 should not be used to perform match-on-card functionality without first determining whether a license is needed and obtaining such a license as appropriate.

Specifications

Key features of the Lumidigm V371 Reader are as follows:

Lumidigm® multispectral imaging fingerprint technology

Convenient, single-handed interface with contactless card cradle

Flexible single-factor and two-factor authentication options

State-of-the-art liveness detection

Support for MIFARE® Classic, MIFARE DESFire® 0.6, and MIFARE DESFire® EV1 contactless cards

The V371 was designed to be rapidly integrated into customer applications. HID Biometrics provides tools and documentation to assist integrators and customers in designing solutions around the V371 including the Lumidigm software development kit (SDK) and interoperability library (Windows®)

DISCLAIMER: The Lumidigm V-Series V371 Reader, as sold, does not perform match-on-card functionality.
