

IDBridge CT5000 - Dual slot contact programmable terminal

Brand: Gemalto
Product Code: SMAG1002279

Description

Dual slot contact programmable terminal.

The IDBridge CT5000 is flexible terminal that will allow developers to quickly get their applications running on terminals to deploy into the field. The CT5000 comes complete with a development kit to allow organisations to quickly roll out their applications to the field. With the ability to update the applications and the firmware via a USB token it is an ideal terminal for deployment across multiple uses.

It is especially a cost effective platform for Retail (Point of sale, Membership, Loyalty and closed payment applications) as well as for identity verification.

As standard the terminal can support 2 ID-1 cards and has two SAM modules.
