
Training - Mastering UICC Cards for LTE Networks

Brand: Smartjac Industries Inc
Product Code: SMATRRAIN100

Description

Mastering UICC Cards for LTE Networks - Training

At the end of the training you will

- Understand UICC card functionality for LTE, to ease analysis & management of cards using admin. tools
- Have a clear overview on security mechanisms, and what subscriber-related information is stored in such cards
- Understand the concepts & mechanisms around VAS toolkit technology & new service opportunities with latest standards
- Have a clear overview on the process & security around OTA, for remote management of UICC cards on LTE networks
- Benefit from real field feedback on what USIM – ISIM cards & services are currently deployed on LTE & IMS networks

Who should attend?

- MNO SIM & Device Management Teams
- VAS Innovation & Project Management Staff
- Network Infrastructure & Handset Manufacturer Testing Teams

- Roaming Staff
- Security Teams...

Pre-requisites:

Good knowledge on SIM & USIM cards

Key topics

- SIM, USIM, UICC
- ETSI/3GPP SIM Standards
- PIN & EPS Authentication
- Inter-standard Roaming
- Toolkit & VAS
- OTA over HTTPS process & security
- ISIM
- SIM Tools (admin & spy)
